# FISH SPA AN UNIQUE EXPERIENCE THAT NATURE PROVIDES US

The perfect solution for our feet with a treatment that eliminates dead cells and at the same time regenerates the skin in a completely natural way.

It treats skin problems in a safe and effective way thanks to the GARRA RUFA fish, the "medical fish", originating in Turkey. Treats various dermatological problems (psoriasis, eczema, calluses and hardness). When you set foot in the fish spa, Garra Rufa (a toothless species) takes care of sucking out dead skin cells, leaving it smooth, clean, healthy and at the same time processing and spreading an enzyme with a regenerating effect on your skin (anthracine). In addition, the impulses and micro-succtions of the "masseur fish" stimulates acupuncture points and improves blood circulation. This natural and rejuvenating peeling leaves the skin, clean, silky and nourished.
